

**Bernard Fourie**

Medicine in Need (Mend)

Bernard Fourie is Chief Scientific Officer of Medicine in Need (Mend), a USA-based non-profit drug and vaccine delivery technology development organization, and Managing Director of Mend South Africa (Pty) Ltd, the translational and manufacturing subsidiary of Mend. He also holds a position as Extraordinary Professor in the Dept of Medical Microbiology at the School of Health Sciences, University of Pretoria, South Africa, and serves on the Clinical and Epidemiological Advisory Board of the Aeras Global TB Vaccine Foundation. His experience lies predominantly in the pre-clinical (bacteriological and experimental animals) and clinical (Phase I to Phase III) evaluation of anti-TB medications, but he has also made relevant contributions to the field of pulmonary delivery of drugs and TB vaccines. In the latter context, he is closely involved in the re-formulation and clinical evaluation of BCG and other live vaccines as spray-dried powders.
